Election/Restrictions

Claims 1-136 are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-61 and 134-136, drawn to a semiconductor device, classified in class 257, and subclass 292.

Group I contains claims directed to the following patentably distinct species of the claimed invention:

- a) Species I, e.g. claims 1-21: Image device with a photosensor
- b) Species II, e.g. claims 22-40: Image structure
- c) Species III, e.g. claims 41-61: Photodiode structure
- d) Species IV, e.g. claims 134-136: Processing system

Group II. Claims 62-133, drawn to process of making a semiconductor device, classified in class 438, and subclass 48.

Group II contains claims directed to the following patentably distinct species of the claimed invention:

- e) Species V, e.g. claims 62-85: Method of forming an image device with a photosensor
- f) Species VI, e.g. claims 86-108: Method of forming an image structure
- g) Species VII, e.g. claims 109-133: Method of forming a photodiode structure

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, no claim is generic. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that all claims are generic is considered non-responsive unless accompanied by an election.

3. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species. M.P.E.P. 809.02(a). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of

the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filled petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

5. Any inquiry concerning this communication on earlier communications from the examiner should be directed to Mai-Huong Tran, (571) 272-1796. The examiner can normally be reached on Monday-Thursday from 8:00 AM to 6:30 PM. The examiner's supervisor, David Nelms can be reached on (571) 272-1787.
